

# Security Codes & Authority Levels (cont'd)

## How to Assign User Codes and Attributes

The following lists the various command strings for adding user codes and attributes.

**Refer to the User Setup chart at the back of this manual for factory defaults of user attributes and to keep a record of user programming.**

**NOTE:** Partition Master codes (VISTA-20P Series only) apply only to those user numbers previously assigned (by the system master/installer) to the partition master's partition.

### Add User Code:

*(Users 03/33 are preset to partition programmers, but can be changed.)*

System/Partition Master code + [8] + user no. + new user's code

User 01 = installer      User 03 = partition 1 master

User 02 = master      User 33 = partition 2 master

The Keypad beeps once to confirm that new user was added.

### Delete User Code:

System/Partition Master code + [8] + [user no.] + [#] [0]

The user code and all attributes\* programmed for this user number, including any associated RF keys, are erased from the system.  
(\*except assigned partition)

### Authority Level:

Factory Defaults:  
users 04-32/34-49 = 0  
users 03/33 = 4

System/Partition Master code + [8] + [user no.] + [#] [1]+ auth. level

Authority Levels (see definitions on previous page):

0 = standard user      3 = duress  
1 = arm only      4 = partition master (VISTA-20P Series only)  
2 = guest

### Access Group:

Factory Defaults:: none

System/Partition Master Code + [8] + [user no.] + [#] [2]+ group (1-8)

You can assign users to a group, then set an access schedule that defines the times this group of users can operate the system. The system ignores these users outside the scheduled times.

### User's Partition:

(VISTA-20P only)  
Factory Defaults:  
Part. 1 = users 03-32  
Part. 2 = users 33-49

System Master Code + [8] + [user no.] + [#] [3] + [0] + partition(s) + [#]

This command assigns the partitions the user can access. If more than one, enter partition numbers sequentially, then press [#] to end. E.g., master code + [8] + [user no.] + [#] [3] + [0] + [1] [2] + [#] gives the user access to partitions 1 and 2 and the common partition.

Partition Entries: 1 = partition 1 and common  
2 = partition 2 and common  
3 = common partition only

### RF User Number:

Factory Defaults:: none

Master/Part. Prog. Code + [8] + [user no.] + [#] [4]+ zone no.

Use this command to assign a wireless button device (keyfob) to this user (keyfob must be enrolled in system first; see installer).

Zone number: enter the zone number assigned to a button on the keyfob that will be used for arming/disarming by this user.

### Pager On/Off:

Factory Defaults:  
users 01-49 = 1 (on)

Master/Part. Prog. Code + [8] + [user no.] + [#] [5] + 0 or 1

You can program a user so that a message is sent to a pager whenever this code is used to arm or disarm the system.

Paging On/Off: 1 = allow paging; 0 = no paging for this user
